PERENNIAL | Height 24-48" | Width 12-18" | DRY MED | F P

Lespedeza capitata

Round-headed Bush Clover, Roundhead Lespedeza, Rabbit Foot

Family: Fabaceae/Legume

Garden Companions

- Plants that do well in poor or rocky soils

Notes

- Growth habit: upright/stiff stems
- As a legume, it helps fix nitrogen in the soil
- Attracts beneficial insects
- Performs best in full sun
- Rabbits and deer often will nibble

Cape Cod Native

Blooms August to September

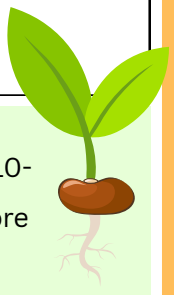
Caterpillar/Moth Host Plant

Provides Bird Seeds/Fruit

Container Friendly

Recommended by Xerces Society

Drought Tolerant



Propagation Information

- Seeds require scarification and a 10-day cold stratification period before germinating in a warm location
- Blooms in 2nd year
- Self-seeds at a medium rate

Summer Bloomer
